

# WINTER SCHEDULE

NOV. 1 2015 TO MARCH 31, 2016  
WATERING GUIDELINES  
CALENDAR

## Colder Weather Reduces Your Lawn's Need for Water

You can turn off automatic sprinklers now that cooler weather has arrived. Our winter watering schedule begins Nov. 1 when most lawn grasses go dormant and require much less water. Please only operate sprinklers when needed and no more than once a week.

Plano's watering schedule is based on the last digit of your service address. Addresses ending in zero are considered even. Irrigation systems operated by homeowner associations (HOAs) follow the even address schedule. Use this calendar to remember your available watering days through March.

**Odd Addresses:** Tuesdays

**Even Addresses:** Thursdays

### LEARN THE GUIDELINES FOR OUTDOOR WATER USE:

- > If watering is needed, set your sprinklers to run when the temperatures are warmer, between 10 a.m. and 6 p.m., to avoid icing of streets and sidewalks.
- > Planting cool season grasses, such as rye or fescue, is discouraged. These grasses require extra water in colder weather.
- > Avoid excessive water runoff and watering when rain, ice or snow is expected.
- > For more tips on ways to save water outdoors, visit [plano.gov/outdoorwateruse](http://plano.gov/outdoorwateruse).
- > Sign up for weekly texts or emails with recommendations on how often to run your sprinklers at [watermyyard.org](http://watermyyard.org).
